

Step by step process of doing a sprint for bug in “Daraz”

- Go to url :
<https://www.daraz.com.bd/?spm=a2a0e.27096439.header.dhomm.e50367d1dzgk5eS#>
- Then when we change the language to English the language icon change to bangle. The picture below shows that:

- To start the project we need to create a project named as the project name in project management tool Jira. Then create an issue in Jira and add summary, description and assign it to someone in the team to solve the bug .Also for help add the picture of that bug :

- After creating the issue we will start the sprint by clicking the “Start sprint” button. Then creating the it this is what it will look like from start:

- When the person who gets the work and start doing it ,they will inform as In progress and it will show like this. Here in Figure the issue is in “IN PROGRESS ” stage, which means the assignee is working on it:

Projects / Daraz

Backlog

Q N K Insights ...

DAR Sprint 1 Add dates (1 issue) 0 0 0 Start sprint ...

DAR-1 After changing the language to Bangla to English the language icon did not change to English. IN PROGRESS K

+ Create issue

- In the end when it will be done and they will remove the bug they will inform as Done which means the developer or assignee has fixed the bug/issue and has been updated the system.:

Projects / Daraz

Backlog

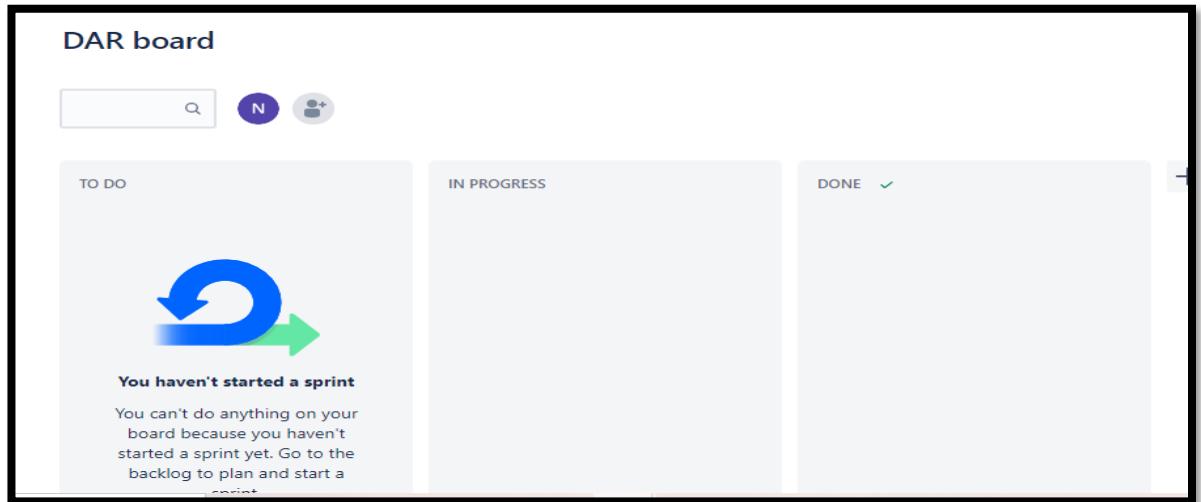

Q N Epic Insights ...

DAR Sprint 1 Add dates (0 issues) 0 0 0 Start sprint ...

Plan your sprint
Drag issues from the **Backlog** section, or create new issues, to plan the work for this sprint. Select **Start sprint** when you're ready.

+ Create issue

- After the job is done if there is nothing to do left in the sprint we will complete the sprint by clicking “Complete sprint” button. Here in Figure.6, the sprint is completed and there is no issues left to solve.

THE END
